

Wildfly – deploy web application

.war file 생성

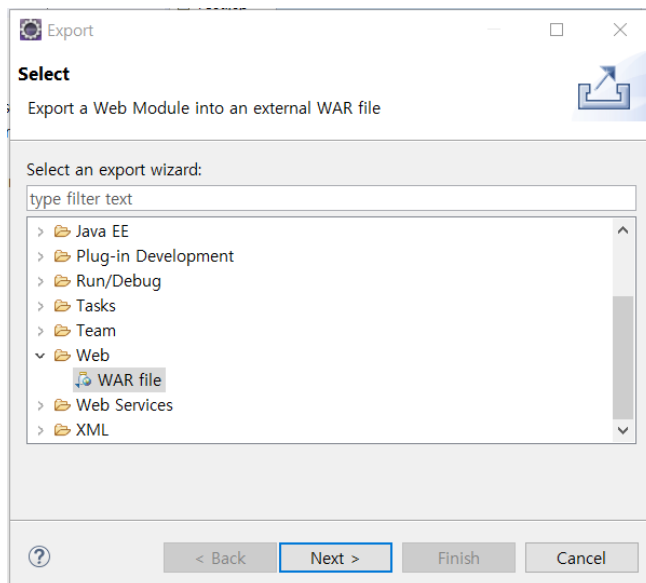

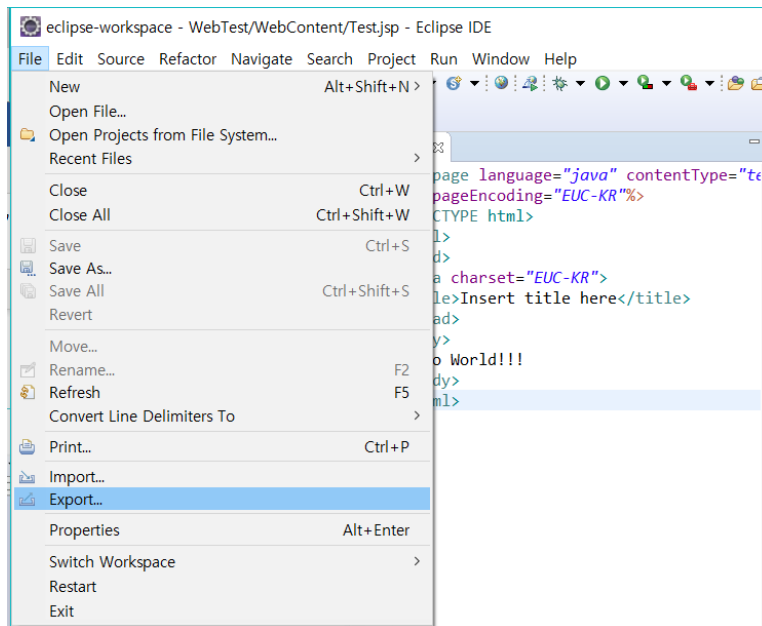

본 프로젝트의 git repo 에서 .war 파일을 다운받아 사용해도 된다.

1. Eclipse에서 web project 생성하기

2. File – Export – Web – WAR file 선택 및 저장.

.war file을 deploy하기

<https://sarc.io/index.php/was/766-quickstart-aws-wildfly-10-application>

```
[root@ip-172-31-44-200 bin]# ./script1.sh
```

1. wildfly 실행 후

```
[root@ip-172-31-44-200 bin]# ./jboss-cli.sh --connect
[standalone@localhost:9990 /] deploy /home/ec2-user/GIT/KNU-CDP2/theOthers/WebTest.war
[standalone@localhost:9990 /] exit
[root@ip-172-31-44-200 bin]# pwd
/opt/wildfly-16.0.0.Final/bin
```

2. CLI 모드에서 deploy

3. 그 후 <http://18.222.252.190/WebTest/Test.jsp> 로 접속
